

Additional test requirements for entry or transit through Singapore

Dear Trade Partners

Please see below the additional test requirements for entry or transit in Singapore.

- a) All travellers from Category I countries¹ **entering or transiting** through Singapore must now complete a pre-departure ART administered at clinic or PCR test.
- b) All travellers from Category II (non-VTL), III and IV countries **entering** Singapore will be required to complete an on-arrival PCR test.
- c) On top of existing pre-departure PCR / ART test 2 days before departure and on arrival PCR test requirements, all **VTL travellers entering** Singapore will be required to complete the following additional tests:
 - ART administered at Quick Test Centres² by 2130 (Singapore time) on Day 3 and Day 7 of their arrival in Singapore, test costs SGD15 each, and
 - Perform daily self-administered ART on days 2, 4, 5 and 6. Results of these self-administered ARTs must be uploaded online to a link that will be sent to the passenger's declared contact details

Self-isolation is not required from Days 3 to 7 on arrival in Singapore, unless tested positive. Travellers aged 2 and below (based on calendar year) are exempted from test requirements.

As the situation remains dynamic, do refer to the Covid-19 Information Centre³ on our website for the latest information.

Please check the safetravel website FAQ if you have any additional questions (<https://safetravel.ica.gov.sg/vtl/faq>). It is a useful source for questions such as whether a test is required if pax is departing SIN on the same day.
